PERSONAL INTERVIEW AGENDA  
(for discussion purposes only)

1. Discuss the finality of the action. Note that there were no substantive amendments, the amendments were merely for clarification purposes (especially claim 18). Thus, the amendment could not have necessitated the new rejection and thus the action cannot be made final. See MPEP §706.07(a).
2. The rejection of the use of the term and/or is not proper, because its usage is not indefinite.
3. There is no teaching in any cited reference that comports with packets being routed "by said gateway to said secured domain without said gateway decrypting all of the encrypted packets transported during a session".
4. There is no suggestion in any reference that the packets remain encrypted using a wireless encryption protocol through at least one gateway without decryption.
